

The Franklin Township Department of Public Works is making every effort to remove trees and limbs on municipal roads to prepare for JCP&L's power restoration.

Please be advised that the DPW will not be picking up or chipping leaves/brush/limbs from private property. Several residents have removed debris from their property into the roadway and this is hampering our efforts to clear roadways. We need to remind you that it will be necessary for residents to make arrangements with a private hauler to remove any debris from their property as a result of this most recent storm. We are asking that residents do not place the debris on or in the municipal right of way. Manpower and equipment do not allow the DPW to provide this service at this time.
